Interpolation (If Coverage A is less than \$5,000,000)

Deductible Factor

- Divide the difference between the desired Coverage A and the lower Coverage A by the difference between the upper and lower Coverage A bounds.
- Multiply by the difference between the high and low deductible factors.
- Truncate after four decimal places.
- Add to the low Coverage A deductible factor.

Maximum Premium Credit

- Divide the difference between the desired Coverage A and the lower Coverage A by the difference between the upper and lower Coverage A bounds.
- Multiply by the difference between the high and low Maximum Premium Credit.
- Dollar round.
- Add to the low Maximum Premium Credit amount.

Note: The Percentage Wind/Hail Deductible should not be less than the Policy Deductible.

3. INFLATION GUARD

Forms HO 00 02, HO 00 03 and HO 00 03D - The policy must be endorsed to provide an automatic annual increase of the Section I Limits of Liability.

Note: Manufactured Homes cannot have inflation.

The inflation percentage is based on an index of construction costs. The percentage factor used to increase the Section I Limits of Liability is printed on the Declarations page and mailed annually.

Use Endorsement HI - Inflation Coverage
